

PROJECT MANAGEMENT AS A SERVICE (PMaaS)

The turn-key solution for optimizing service delivery workforce

Project Management thought leadership and consulting expertise

To drive large scale transformation, organizations are challenged with maintaining current business needs while adapting to the growing demand of enterprise-wide programs. Milestone delivers end-to-end Project Delivery services for companies that need thought leadership and best-practices to optimize their PMO capabilities.

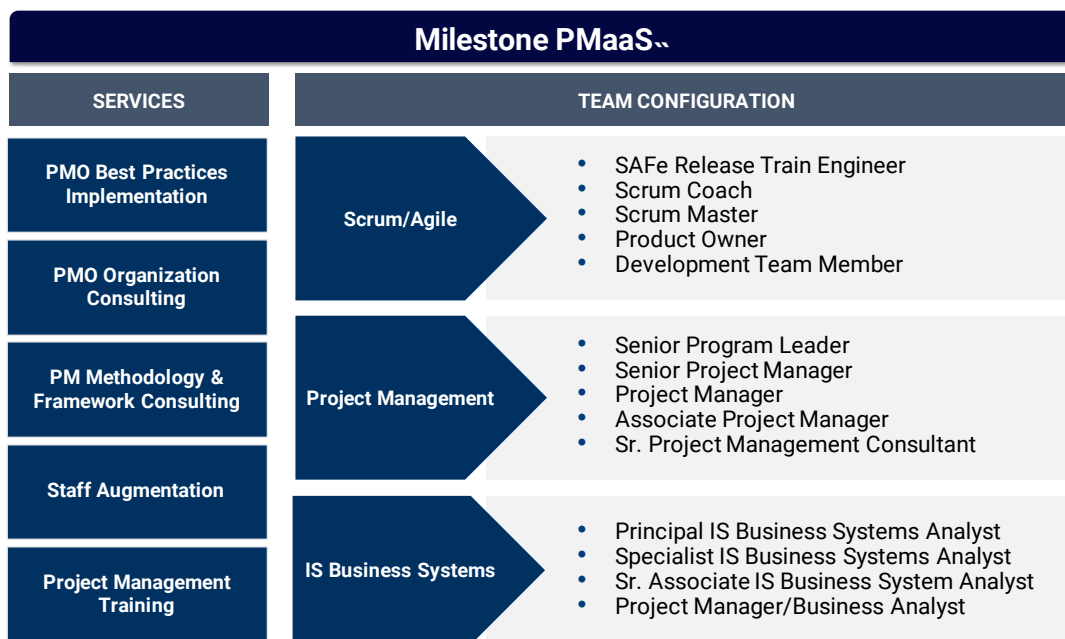

End-to-end project lifecycle management services

Milestone PMaaS delivers a range of benefits to organizations that need managed resources to meet project demands:

- **Experienced Project Management** – Proven expertise in managing large-scale PMO efforts results in 15-20% annual savings.
- **Access to Experienced Resources** – We source from our skilled and vetted pool of professionals making it easier to add resources for similar positions that are shared across projects for greater efficiency.
- **Stakeholder-Driven Support** – A dedicated Project Delivery Executive is assigned to you and ensures all programs and processes are adjusted to fit your needs.
- **Performance-Based Delivery** – Outcomes are assessed against established KPIs and SLAs, and improvements are implemented based on best practices and the established roadmap.

Areas of Expertise

PMaaS supports your organization with a flexible set of services that include:
